TRANSFORMATIVE ACTIONS

**Determine optimal future energy system for Hawai‘i**

• Major energy stakeholders participate in 3rd party facilitated process within the next three months before any long-term commitments are made on infrastructure (cable, LNG, gen plant and grid modernization)

**Define comprehensive regulatory compact for 21st century utilities within 18 months; Define principles in 3 months**

• Pricing/rates, stranded costs/exit charges, multiple revenue streams for utility and customers for clean energy services, novel business strategies, performance-based incentives, prosumer rules, interconnection, transmission and pipeline access, include risks in costs
TRANSFORMATIVE ACTIONS

**PUC/CA Funding**

- Provide the PUC/CA with full funding (~+1-2 MM) if the PUC will make critical decisions on #1 and #2 within 18 months

**Customer empowerment**

- Provide infrastructure that will dynamically manage energy supply and demand
- Provide information that will allow customers to participate in managing supply and demand
- Provide a pricing structure that will incentivize behaviors that enable clean energy and help dynamically manage the system by properly value electrons based on time, type and location
TRANSFORMATIVE ACTIONS

Transportation solutions

- HCEI transportation charrette will establish a timeline and realistic expectations of deliverables for cutting petroleum use in the sector
- HCEI transportation charrette will present the planning, regulatory and funding requirements necessary to carry out the next steps
