

HAWAII: THE STATE OF CLEAN ENERGY

Hawai'i: The State of Clean Energy

Mike Hamnett

Co-Chair, Hawaii Energy Policy Forum

University of Hawaii

Hawai'i: The State of Clean Energy

- HEPF Vision – smart energy solutions
- State Energy Goal -- 70% clean energy by 2030
- How are we doing?
- How we can we do better?

Electricity

- Are we on track for renewables?
- Are we on track for efficiency?
- Are we paying too much?

Transportation

- Are we making any progress at all?
- Are EVs the way to independence?
- What are our options?

Big Decisions Loom

- Placing wind and solar
- Building a statewide grid
- Growing local biofuel
- Importing Liquid Natural Gas
- Addressing the Tesoro closure
